Selection

Century Group is the industry leader in manufacturing and supplying the highest quality precast concrete steps for residential homes, commercial and industrial facilities. The Century concrete steps are available in sixteen different sizes which gives the customers the selection required to meet their specific need and application. The Century step can be “stacked” in unlimited combinations and can be placed side by side should a wider tread be desired.

Easy Installation

Century steps are manufactured from light weight concrete making handling, delivery, and installation of your step safe, and easy. Utilizing lifting slings or fork adaptors the Century steps are easily loaded into pickup trucks or trailers. Using step handling bars or a step handling dolly customers can easily pickup, and install their durable, lightweight Century step.

Safety

The Century concrete step riser height and tread depth meet residential building codes to insure maximum safety and convenience to all user groups. To enhance the Century step, ready-to-install aluminum handrails are available for every style of step. The handrails are one piece, all welded construction allowing them to be installed by one person in minutes. These attractive and safe handrails meet most building codes, military and insurance company specifications. Being durable, simple to install, economical and versatile makes the Century step and its accessories a very attractive addition to your product line and will enhance your profitability in the future.

Durability

The Century step is portable, manufactured of high strength, lightweight, steel reinforced concrete for durability and convenient installation. The one-piece construction of the Century step requires no assembling, no form-work, no labor for installation. Once the Century concrete step is installed maintenance is nonexistent for decades. Century steps are ideal in tropical and sub-tropical zones. Fungi, insects, heat, humidity, excessive precipitation or decay will not affect their permanence, performance or safety. Century steps are manufactured using special concrete admixtures which make them very durable in areas that have frequent freeze/thaw cycles. Do not use salts or deicers on steps. Use a penetrating sealer for protection once a year.

Reputation

Look at our history and you'll find that Century Steps® has pioneered most of the major advances in the precast concrete step industry. The founder of Century Steps®, Inc. invented the first precast concrete step and was the first to mass-produce them. Century Steps®, Inc. was the first company to reduce the weight of steps by using lightweight concrete. Even today the Century step due to its unique design is the lightest precast concrete step on the market. Century Steps®, Inc. was the first company to design and develop step handling bars, buggies, forklift attachments and chain slings to handle steps in a safer and more efficient manner. Century Steps®, Inc. has always been the premier innovator in the concrete step industry and it is Century Step's® commitment to the customer to strive to offer the most attractive and durable concrete steps possible.

Quality

Century Steps®, Inc. has continued to be the leader in the concrete step industry because of its commitment to quality. The Century step is manufactured using only the best lightweight aggregates, galvanized steel reinforcement and cement available in producing a lightweight durable concrete step. Century Steps®, Inc. has its own approved testing lab which allows it to continually test and monitor raw materials insuring that the quality of our product is never compromised. Century Steps®, Inc. is committed to the continual training and education of its most important asset, a skilled and knowledgeable work force. Century Steps®, Inc. manufactures its own molds and handrails in its

company owned modern steel fabrication plants. This assures that each product manufactured is uniform and meets the highest standards. Quality and safety are two words Century Steps® does not take lightly and continues to make them the highest priorities.

Profitability & Marketability

Once you are acquainted with Century Steps®, you will realize the economical advantages of including a selection of Century Steps® in your inventory. Through the years, customer acceptance has been phenomenal. Customers enjoy the durability, easy handling, relatively lightweight, simple installation and attractive appearance of the Century step. These factors join to create a product which is readily marketed and will prove immediately to be a very profitable item in your business.
